EXPERIENCE

AI Infrastructure Engineer Intern

Blaze (YC S'24)

May 2026 – Present

San Francisco, CA (Remote)

- Built an Agent Brief API (Node/TypeScript) on agentic.market transforming raw text into structured JSON briefs for AI agents, with x402 payment integration for per-request monetization.
- Engineered a multi-stage agentic viral video pipeline in Python with FFmpeg transcoding, caption generation, and Postiz publishing adapters for TikTok and Instagram Reels; separately built a Remotion-based vertical video system (1080x1920) with hosted Express API for on-demand MP4 rendering.

Backend & AI Engineering Intern

Venu AI (YC W'21)

Apr. 2026 – Present

San Jose, CA (Remote)

- Built an AI-powered personalized email outreach system integrating LLM-generated content with CRM data to drive top-of-funnel sales for founders and conference stakeholders.
- Developed a React matchmaking feature pairing attendees, speakers, and sponsors via semantic similarity; designed scalable Azure backend services (Functions, Blob Storage, Service Bus).

Software Engineering Intern

Appli AI (LOI Accelerator)

May 2026 – Present

Montreal, QC (Remote)

- Shipped features and bug fixes across the stack for an AI-powered hiring platform (work trials, candidate screening, interview automation) backed by LOI Accelerator.

AI Agent Developer Intern

NeuralSeek AI

Sept. 2025 – Dec. 2025

Miami, FL (Remote)

- Shipped a production AI agent on AWS completing the mAIstro Challenge with 100% on-time delivery; designed a multi-agent pipeline (triage, execution, review) cutting task resolution time by ~40%.
- Ran 3+ design iterations on competitive research findings, improving agent response accuracy by ~30% on evaluation benchmarks.

PROJECTS

OraxAI | React, FastAPI, Python, OpenAI API | oraxai.ca

Dec. 2025 – Present

- Built an end-to-end AI resume tailoring platform: designed the ATS scoring engine, React frontend, and FastAPI backend; iterated on live user research and demos.
- Grew to 100+ monthly active users and \$2K+ MRR through SEO and organic social growth to 10K+ followers and 1M+ views.

NeuralForge | Verilog, PyTorch, FPGA, INT8 | [github](https://github.com)

2025

- Custom FPGA accelerator running INT8 LeNet-5 CNN inference on a 4x4 weight-stationary systolic array with Verilog RTL, Python simulation, and PyTorch baselines.

Lyric Engine | Python, Llama 3.1, LoRA, Beam Search | [github](https://github.com)

2025

- Phonetic-aware lyrics generation system with a dual BPE + ARPAbet tokenizer, genre-specific LoRA adapters with runtime blending, and constrained beam search enforcing rhyme, syllable count, and emotional arc.

EDUCATION

University of Waterloo

BASc Electrical Engineering

Waterloo, ON

Sept. 2026 – Present

Maisonneuve College

Diploma of College Studies, Pure & Applied Sciences

Montreal, QC

Jan. 2024 – Dec. 2025

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL, Verilog

Frameworks & Tools: React, FastAPI, Django, Node.js, AWS, Microsoft Azure, Docker, Git, PyTorch, Hugging Face, OpenAI API, Amazon Bedrock, Remotion

Spoken Languages: English, French, Arabic (all fluent)

AWARDS & RECOGNITION

Mathematics Olympiad Finalist — Casablanca, Morocco

Micro-internship, Pratt & Whitney — AI Integration in Computing Systems (2025)

Micro-internship, Bombardier — Training & Development (2025)

KPMG Ace the Case Participant (2026)
